## New UL NEMA Rating available for Text-based OCS

Horner APG is pleased to announce the availability of an additional UL rating for the Operator Control Station (OCS) product family. In addition to the UL Class I, Division II and CUL ratings currently on all OCS products, a new UL50 (NEMA 250) rating is now available on some models. This rating indicates that UL officially recognizes the OCS for NEMA 12, NEMA 4, and NEMA 4x environments. To receive product with this rating, customers must specify a special part number extension (see *Ordering Information*).

The OCS has traditionally been used in NEMA 12, 4, and/or 4x environments. However, like most other industrial devices in its class, an official UL NEMA rating has *not* been available for the product. This can cause a UL inspector to place a less desirable “UL NEMA 1” rating on a machine. With the availability of this new rating, machines utilizing text-based OCS now can receive the more desirable “UL NEMA 12”, “UL NEMA 4” or “UL NEMA 4X” rating from UL.

This rating is available on *all* miniOCS models, the OCS100 & OCS110, and the OCS200 & OCS210. It is *not* yet available in the Graphic OCS250 or Color-Touch OCS models.

### Ordering Information

Part Number Extension	Description
-18	UL50 (NEMA 250) Enclosure Environmental Ratings – Type 4, 4x and 12 (Indoor Use Only). Standard OCS Keypad. No Extra Charge.
-19	UL50 (NEMA 250) Enclosure Environmental Ratings – Type 4, 4x and 12 (Indoor Use Only). Blank/OEM Customized Keypad. No Extra Charge.
