## FREE OPClite Server for CsCAN™

### Summary

OPClite for CsCAN™ is a FREE utility included on the installation CD with Cscape™ 5.0 or later. This software utility allows users of the Operator Control Station (OCS) family of products to access live data from the OCS through its RS-232 programming port. This data can be accessed from any software product that supports an OPC Client connection. This included CIMPLICITY™ Plant Edition, CIMPLICITY™ Machine Edition, Microsoft® Access, Visual BASIC and Visual C++.

### Single-Point-of-Connect Data Access

Due to the single-point-of-connect capabilities of OCS and CsCAN, a whole network of controllers may be accessed using OPClite for CsCAN. The only requirement is that one of the controllers must be serially connected to the PC.

### Fully-featured OPC Server also Available

The OPClite product is a bare-bones, inexpensive means for accessing data. For additional flexibility, features, and performance, our full OPC Server for CsCAN is also available. This product is competitively priced, and offers connectivity through several methods. The feature matrix below compares the products.

Feature	CsCAN OPClite	CsCAN OPC
Serial Connection to OCS	Yes	Yes
Single-Point-of-Connect	Yes	Yes
Multiple Network Support	No	Yes
CsCAN PCI/ISA Card Support	No	Yes
Tag Support / Tag Browsing	No	Yes
