Sneak a Peek at NEW OCS Products!

Order Today for November 27th Delivery

Price List Addendum Included

NEW! SVGA Color-Touch OCS Screens in 8 inch, 10 inch, 12 inch

We've added three, new large screen, high resolution color-touchscreens to the OCS product line. These new touchscreens have it all . . . dual processors, 800 x 600 SVGA displays, easy scalability across the product line, seven configurable function keys, 32,000 colors, built in CompactFlash and Ethernet port. Supports SmartStack I/O using fiber optic FOX 100 I/O or our new SmartStix I/O. [PDF OCS Cutsheet](#)

NEW! Cost Effective and Space Efficient, SmartStix Expands I/O Capacity

If you love SmartStack I/O you're going to love SmartStix I/O, our new compact, terminal-block style I/O for OCS. From the miniOCS to the Color-Touchscreen OCS products, SmartStix I/O easily expands I/O capacity. And it's the ideal choice for applications with a large number of remote digital I/O. [PDF SmartStix I/O Cutsheet](#)

NEW! FOX100 SmartStack I/O Module Expands Your Options

FOX100 SmartStack I/O increases your I/O capability from four SmartStack I/O Modules to up to 23. (5 FOX bases + 3 SmartStack Modules on the OCS). [FOX100 New Product Bulletin](#)

NEW! Cscape 6.0 is Coming Soon!

Cscape version 6.0 supports all of the new products above and provides new features and functions such as programming over Ethernet, dynamic color selection on graphical objects, a Font Editor/Manager, and a lot more. [Cscape 6.0 New Product Bulletin](#)
